                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   A plasmid contg. the gene is isolated by forming a gene library from plasmid DNA of B.thuringiensis israelensis (HD 522 strain, USA Goldberg ONR60) followed by screening with anti-israelensis insecticidal protein IG. The insecticidal protein is highly effective against Diptera, esp. Aedes. (Updated on 24-OCT-2003 to standardise OS field)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            New insecticidal protein of bacillus tulingensis islaerensis prepd. by isolating plasmid contg. insecticidal protein gene gene library from plasmid deoxyribonucleic acid, etc.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 4934 BP; 1797 A; 749 C; 877 G; 1511 T; 0 U; 0 Other;

Plasmid pMYC1625, selected in Escherichia coli, contained a 8.0 kb insert expressing a beta-endotoxin gene. This was sequenced (AAQ81178). A cured, acrystalliferous B.t. host carrying pMYC1625 produced a 130 kDa crystal protein (AAR63078) toxic to calliphorids. (Updated on 25-MAR-2003 to correct PN field.)

PS71M3 [from B.t. PS71M3-69] [NRRL B-18513]. It is related to the cryIVA family of genes, the 140 kD endotoxin gene and the type II gene from B.t. var. israelansis The gene encodes a 130 kD protein. Microorganisms transformed with the DNA may be administered to dipteran insects or their environments, the expressed toxins acting as an insecticide. See also AAQ14670-Q14672.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             27-AUG-2003
25-MAR-2003
30-MAY-1990
The sequence encodes the 130 kDa delta-endotoxin gene from B. thuringiensis subsp. israelensisis and is a 4.46 kb insert of pCH130. The delta endotoxin protein is insecticidal and can be used to control insect pests esp. mosquitos. See also AAN93054. (Updated on 25-MAR-2003 to
                                                                                                                                                                                                                                               DNA fragment encoding insecticidal protein - obtd. thuringiensis sub species israelensis, and used in plant cells.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     AAN93059

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Post-processing: Minimum Match 0%
               Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 4, Application US/10929754

Sequence 4, Application No. US20050124803A1

GENERAL INFORMATION:
APPLICANT: ABDULLAH, MODH AMIR
APPLICANT: BABULLAH, MODH AMIR
APPLICANT: DEAN, DONALD H.
TITLE OF INVENTION: INSECTICIDAL CRYSTAL PROTEINS WITH ENHANCED TOXICITY
FILE REFERENCE: 22727/04179

CURRENT APPLICATION NUMBER: US/10/929,754

CURRENT FILING DATE: 2004-08-30
PRIOR APPLICATION NUMBER: 60/498,826
PRIOR FILING DATE: 2003-08-29

NUMBER OF SEQ ID NO 4

SEQ ID NO 4

LENGTH 4391
TYPE: DNA
ORGANISM: Bacillus thuringiensis

ITITLE OF INVENTION: PROTEIN HAVING INSECTICIDAL ACTIVITY, DNA ENCODING THE PROTEIN, A

TITLE OF INVENTION: NOXIOUS ORGANISM-CONTROLLING AGENT AND METHOD

FILE REFERENCE: Q66821

CURRENT SPLICATION NUMBER: US/10/089,678

CURRENT PAPLICATION NUMBER: US/10/089,678

CURRENT FILING DATE: 2002-05-02

PRIOR APPLICATION NUMBER: D7 2000-236140

PRIOR FILING DATE: 2000-08-03

PRIOR APPLICATION NUMBER: PCT/JP01/06660

PRIOR FILING DATE: 2001-08-02

INDER: OF SEQ ID NOS: 3

SOFTWARE: Patentin version 3.1

SEQ ID NO

I LENGTH: 3504

TYPE: DNA
ORGANISM: Bacillus thuringiensis

PEATURE:
NAME/KEY: exon

LOCATION: (1)..(3501)
